Dr. Karen Horton has been in practice in San Francisco since 2006, focusing primarily on aesthetic surgery for women and aesthetic breast reconstruction. An athletic mother of twin girls and Marin resident herself, Dr. Horton focuses on creating natural results with preservation of muscle function to help patients return to everyday activities quickly after surgery. Dr. Horton's boutique practice hosts an all-female staff whose goal is to ensure each patient has the very best experience and outstanding results.

Karen has a women's touch in the way she approaches each patient individually and incorporates mental, emotional and physical considerations when planning their procedure. Dr. Horton has also developed innovative techniques when it comes to popular female procedures including breast augmentation, tummy tucks, labiaplasty and mommy makeover procedures. Her practice offers non-surgical aesthetic treatments including Botox, fillers, lasers, CoolSculpting and medical-grade skin care by "the gentle injector", Emily Sespianiak, NP.
